

FABRIC SILO

YOUR PRODUCT
IN SAFE HANDS.

AGRIFLEX®

since 1975

STURDY STRUCTURE AND FABRIC WALLS FOR SAFE AND PROTECTED STORAGE.

Fabric silos are specially designed for **storing granular food materials** such as **flours in general, sugar, grains, rice** etc., as well as non-food materials like **plastics**.

The silo has a **sturdy structure** made of galvanized carbon steel or painted steel or stainless steel.

**STURDY STEEL STRUCTURE,
ANTI-STATIC FABRIC
CONTAINER. VARIOUS
SHAPES AND SIZES
AVAILABLE, TO ADAPT TO
DIFFERENT LOGISTIC AND
STORAGE NEEDS.**

The **anti-static fabric** container has been properly designed to withstand static and seismic stresses; it comes in different shapes and sizes and can **adapt to different logistic and storage needs**.

It can be installed indoor or outdoor inside a protective enclosure specially built for this purpose.

Capacity can vary from 1 m³ to 125 m³.

Ideal for storing granular and powdered food products and some plastic materials, such as:

Flour

Sugar

Rice

Grains

Plastics

Isothermal container

The fabric silo is also suitable for outdoor installation if placed inside a protective enclosure that guarantees insulation from any weather conditions – too hot or too cold weather.

Anti-static fabric

The anti-static fabric of the silo is made of conductive threads that discharge static electricity to the ground.

EASY AND FAST INSTALLATION

Easy and fast assembly and disassembly; easily accessible also from the inside.
Modular structure for easy transport.

MODULAR ASSEMBLY

No special access/assembly areas and equipment or tools are required for installation.

COST-EFFECTIVE

Significantly lower costs compared to traditional storage systems.
